# Education/Training Mission Statement

---

## Document Purpose

Give details of the mission statement in relation to pre-hospital care emergency education and training.

## Education/Training Mission Statement

'To provide consistently high standards in developing and delivering innovative healthcare training solutions'

At Hibernian Healthcare we are dedicated to delivering training that creates a positive learning experience and equips learners with the tools to treat acutely ill patients before their admission to hospital. We train in the technical aspects of pre-hospital care but also in instilling confidence and assurance in such potentially stressful events.

All of our training fulfils required standards. We use experienced tutors who have experience in a range of medical backgrounds to give first class training and advice to learners.
